

GUJARAT TECHNOLOGICAL UNIVERSITY, AHMEDABAD, GUJARAT

COURSE CURRICULUM

Course Title: METROLOGY & INSTRUMENTATION

Code: (3341905)

Diploma Programme in which this course is offered	Semester in which offered
Mechanical Engineering	FOURTH

1. RATIONALE:

The students of Mechanical Engineering branch are basically concerned with manufacturing various material components in shops as per given drawing. Today the industrial processing and manufacturing techniques have become complex and complicated and their control is very much difficult by human judgment only. Therefore, the exact and precise measurements are the basic need of the industries. This course of Metrology & Instrumentation, therefore, provides/creates self confidence and helps working on shop floor independently for accurate and precise manufacturing and measurements.

2. COMPETENCY:

- Use various measuring (linear, area, volume, angular, gear, thread, roughness, straightness, squareness, flatness, roundness, pressure, temperature, flow, etc) and gauging instruments-Analog and digital based.

3. COURSE OUTCOMES (COs):

1. Measure the given mechanical elements and assemblies using linear and angular analog /digital measuring instruments.
2. Check geometrical accuracy of given application.
3. Explain surface roughness checking instruments.
4. Measure and derive important dimensions of various thread forms and gears.
5. Select and use non destructive testing methods.
6. Use gauges to check the dimension.
7. Select and measure variables using appropriate sensors and transducers.

4. TEACHING AND EXAMINATION SCHEME:

Teaching Scheme (In Hours)			Total Credits (L+T+P)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	ESE	PA	ESE	PA	
4	0	4	8	70	30	40	60	200

Legends: L -Lecture; **T** -Tutorial/Teacher Guided Student Activity; **P** -Practical; **C** - Credit; **ESE**-End Semester Examination; **PA** -Progressive Assessment.

5. COURSE DETAILS.

Unit	Major Learning Outcomes	Topics and Sub-topics
Unit – I Linear and angular measurement.	1a. Distinguish between accuracy, precision and error. 1b.Explain principle of least count.	1.1 Inspection, quality and quality control-definitions and differences. 1.2 Define accuracy, precision and error. 1.3 Principle of vernier scale and least count. 1.4 Surface plates-types, important features, standards/important sizes, applications and precautions in use.
	1c. Select suitable linear measurement instrument and measure the linear dimension of given component.	1.5 Types, constructional sketch, major parts and their functions, least count , measuring methods and measurement illustration (for e.g. 12.48mm)of: i. Vernier caliper. ii. Micrometer. iii. Telescopic gauge. iv. Height gauge. v. Depth gauge.
	1d. Wring the slip gauge and set given dimension.	1.6 Slip gauge-types, applications, and wringing method.
	1e.Select suitable angular measurement instrument and measure the angular dimension of given component.	1.7 Sketch, major parts and their functions, least count , measuring methods and measurement illustration of: i. Bevel Protector. ii. Sine bar. iii. Angle gauges. iv. Angle Dekkor. v. Spirit level. vi. Clinometers. vii. Auto collimator. 1.8 Calibration – concept and need.
Unit – II Measurement of geometrical tolerances.	2a. Explain working of dial indicators.	2.1 Dial indicators/gauge-types, constructional sketch and applications.
	2b.Set measuring method and measure geometrical tolerance of given part/assembly.	2.2 Definition, symbol and measuring methods of: i. Straightness. ii. Flatness. iii. Squareness. iv. Parallism. v. Perpendicularity. vi. Roundness. vii. Concentricity. viii. Cylindricity. ix. Run out and ovality.

Unit	Major Learning Outcomes	Topics and Sub-topics
Unit – III Measurement of surface roughness.	3a. Define various terminology used for surface roughness. 3b. Explain working of direct instrument methods.	3.1 Terminology used in connection with surface finish. 3.2 Comparison methods to inspect surface finish-concept and applications. 3.3 Direct instrument measurement methods-types and concepts. 3.4 Construction, working and applications of Talysurf surface roughness tester and Tomlinson tester.
	3c. Determine surface roughness of given data.	3.5 Centre line average and Root Mean Square systems of surface texture evaluation-terminology used, concept, equations and numerical examples. 3.6 Indication of various surface roughness characteristics with surface roughness symbols-interpretation.
Unit – IV Gear measurement.	4a. Define various terms used for gear nomenclature. 4b. Use gear tooth vernier to measure gear tooth thickness.	4.1 Types of gears. 4.2 Forms of gear teeth-types and concept. 4.3 Gear tooth Terminology. 4.4 Sketch, major parts and their functions, least count, measuring methods and measurement illustration of gear tooth vernier. 4.5 Derivation and numerical example to measure gear tooth thickness using: a. Gear tooth vernier. b. Constant chord method. c. Base tangent method.
	4c. Explain working of profile projector.	4.6 Gear tooth profile measurement.
Unit – V Thread measurement.	5a. Define various terms used for thread nomenclature. 5b. Determine best wire size. 5c. Use two and three wire methods to determine effective diameter of thread. 5d. Measure the pitch of given thread.	5.1 Threads-classification, elements, specifications and forms. 5.2 Measurement of major and minor diameters. 5.3 Three and two wire method of measuring effective diameter of external thread-concept, terminology used, best wire size, derivation of equation and numerical example. 5.4 Thread micrometer-sketch, method to use and determination of dimension. 5.5 Pitch measurement methods.

Unit	Major Learning Outcomes	Topics and Sub-topics
Unit – VI Limit gauges.	6a. Select and check the given dimension using limit gauge.	6.1 Limit gauges-classification, sketch and applications. 6.2 Comparators-concept, types and applications.
Unit – VII Non destructive testing.	7a. Explain various non destructive testing methods.	7.1 Non destructive testing (NDT) - concept, need and advantages. 7.2 NDT- important methods, working with sketch and applications.
Unit – VIII Transducers and sensors.	8a. Define static characteristics of instruments.	8.1 Instrumentation-introduction, performance characteristics. 8.2 Static characteristics of instruments.
	8b. Explain various transducers and sensors.	8.3 Transducers-concept, classifications, physical quantities which can be measured, advantages and disadvantages. 8.4 Electrical transducers-types, working principles and applications. g. Linear Variable Differential Transformer (LVDT) type pressure gauge. h. Resistance type. i. Capacitance type. j. Inductance type (LVDT). k. Piezo-electric. 8.5 Sensors- classification and applications.
Unit – IX Temperature, pressure and flow measurement.	9a. Select and use appropriate temperature measuring device to measure temperature of given hot body.	9.1 Introduction. 9.2 Classification, working principle, construction, working, advantages, limitations and applications of temperature measuring devices: i. Mercury in glass thermometer. ii. Bimetallic thermometer. iii. Resistance thermometer. iv. Thermister. v. Thermocouple. vi. Radiation pyrometers. vii. Optical pyrometers.
	9b. Select and use appropriate pressure and flow measuring device to measure pressure/flow.	9.3 Pressure measurement scales. 9.4 Types and applications of manometers (only list and applications). 9.5 Working principle, construction, working, advantages, limitations

Unit	Major Learning Outcomes	Topics and Sub-topics
		<p>and applications of pressure measuring devices:</p> <ol style="list-style-type: none"> Bellows type pressure gauge. Diaphragm type pressure gauge. Bourdon tube pressure gauge. Dead weight piston gauge. <p>9.6 Concept of transducer based pressure measuring devices- resistance type, capacitance type and inductance type.</p> <p>9.7 Classification of flow measuring devices.</p> <p>9.8 Working principle, construction, working, advantages, limitations and applications of volumetric flow measuring devices:</p> <ol style="list-style-type: none"> Bellows type. Rotating impeller. Rotating lob. Nutating Disc. Reciprocating piston. Obstruction. <p>9.9 Working principle, construction, working, advantages, limitations and applications of velocity measuring devices:</p> <ol style="list-style-type: none"> Pitot tube. Orifice meter. Rota meter.

6. SUGGESTED SPECIFICATION TABLE WITH HOURS & MARKS (THEORY)

Unit	Unit Title	Teaching Hours	Distribution of Theory Marks			
			R Level	U Level	A Level	Total Marks
I	Linear and angular measurement.	10	06	04	04	14
II	Measurement of geometrical tolerances.	06	02	02	03	07
III	Measurement of surface roughness.	06	02	02	03	07
IV	Gear measurement.	06	02	02	03	07
V	Thread measurement.	06	02	02	03	07
VI	Limit gauges.	02	00	02	02	04

Unit	Unit Title	Teaching Hours	Distribution of Theory Marks			
			R Level	U Level	A Level	Total Marks
VII	Non destructive testing.	06	02	02	03	07
VIII	Transducers and Sensors.	06	02	02	03	07
IX	Temperature, pressure and flow measurement.	08	03	03	04	10
Total		56	21	21	28	70

Legends: R = Remembrance; U = Understanding; A = Application and above levels (Revised Bloom's taxonomy)

Note: This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

General Notes:

- If midsem test is part of continuous evaluation, unit numbers I (Up to 1.6 only), II, III and IX (Up to point number 9.6 only) are to be considered.
- Ask the questions from each topic as per marks weightage. Numerical questions are to be asked only if it is specified. Optional questions must be asked from the same topic.

7. SUGGESTED LIST OF EXERCISES/PRACTICALS.

The practical/exercises should be properly designed and implemented with an attempt to develop different types of cognitive and practical skills (**Outcomes in cognitive, psychomotor and affective domain**) so that students are able to acquire the competencies.

Following is the list of practical exercises for guidance.

Note: Here only outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of Programme Outcomes/Course Outcomes in affective domain as given in a common list at the beginning of curriculum document for this programme. Faculty should refer to that common list and should ensure that students also acquire those Programme Outcomes/Course Outcomes related to affective domain.

S. No.	Unit Number	Practical Exercises (Outcomes' in Psychomotor Domain)	Hrs. required
1	I	<p>PREPERATORY ACTIVITY:</p> <ol style="list-style-type: none"> S.I. basic, supplementary and derived units and their conversions. Convert given length, area and volume from one unit to another. (From mm to cm and m, from mm to inch, from m to yard and foot, from mm² to inch² and vice-versa, mm³ to inch³ and vice-versa ,etc.). Convert given degree to radian and vice-versa. Various drafting, surface finish and geometrical symbols. Define axis, axes, centre, angles, plane, solid 	02

		angle.	
2	I	<p>LINEAR AND ANGULAR MEASUREMENT:</p> <p>Each student will select and bring at least such five mechanical components which will have use of instruments specified below. Same are to be approved by teacher. After approval, student will:</p> <ol style="list-style-type: none"> Sketch each component. Sketch and label main parts of instruments to be used. Calculate least count of the instrument/s to be used. Measure and record applicable dimensions of each component using: <ol style="list-style-type: none"> Vernier calliper. Inside micrometer. Outside micrometer. Telescopic gauge. Height gauge. Depth gauge. Bevel protector. Clinometers. 	14
3	I	<p>SINE BAR:</p> <p>Measure angle between two planes with the help of sine bar and slip gauges.</p>	02
4	II	<p>STRAIGHTNESS:</p> <ol style="list-style-type: none"> Sketch the part and setup, list the instruments used, list the steps followed and record the observations for checking straightness. Plot straightness observations on graph paper. 	02
5	II	<p>FLATNESS:</p> <p>Sketch the part and setup, list the instruments used, list the steps followed and record the observations for checking flatness.</p>	02
6	II	<p>SQUARENESS, PERPENDICULARITY AND PARALLITY:</p> <p>Sketch the part and setup, list the instruments used, list the steps followed and record the observations for checking following.</p> <ol style="list-style-type: none"> Squareness. Perpendicularity and parallity. 	02
7	II		02

		<p>ROUNDNESS,CYLINDRICITY, CONCENTRICITY, RUN OUT AND OVALITY:</p> <p>a. Sketch the part and setup, list the instruments used, list the steps followed and record the observations for checking roundness, cylindricity, concentricity, run out and ovality.</p> <p>b. Prepare polar graph for roundness observations.</p>	
8	III	<p>SURFACE ROUGHNESS:</p> <p>a. Tabulate machining processes, and roughness values (Ra , mm),roughness grade number and roughness symbol.</p> <p>b. Demonstrate various surfaces having different roughness values.</p> <p>c. For given component, sketch the component, judge the roughness of surfaces and show surface roughness symbols on applicable surfaces.</p> <p>d. Measure surface roughness value of given machined surface.</p>	04
9	IV	<p>GEAR MEASUREMENT:</p> <p>a. Sketch gear tooth nomenclature.</p> <p>b. Sketch gear tooth vernier and label each part.</p> <p>c. Calculate chordal thickness and height of given gear.</p> <p>d. Determine tooth height.</p> <p>e. Measure and compare chordal thickness of given spurs gear using gear tooth vernier.</p>	02
10	V	<p>THREAD MEASUREMENT:</p> <p>For given external threaded part:</p> <p>a. Draw nomenclature for ISO screw threads (Internal and external both).</p> <p>b. Explain and derive best wire size.</p> <p>c. Sketch the part and show the dimensions to be measured.</p> <p>d. Sketch the set up and instruments used to measure/derive major diameter, minor diameter and effective diameter using two wire and three wire methods.</p> <p>e. Measure the pitch.</p> <p>f. Use threaded ring gauge.</p> <p>g. Record observations.</p>	04
11	VI	<p>LIMIT GAUGES:</p>	02

		<ul style="list-style-type: none"> a. Demonstrate use of various limit gauges. b. Select appropriate limit gauge for given dimension/part and check the dimension with gauge. c. Record your observations. 	
12	VII	<p>NON DESTRUCTIVE TESTING:</p> <ul style="list-style-type: none"> a. Demonstrate ultrasonic testing of NDT. b. Observe and interpret X ray test of any weld joint. 	02
13	VIII	<p>DEMONSTRATION OF TRANSDUCERS AND SENSORS:</p> <ul style="list-style-type: none"> a. Demonstrate electrical (LVDT type, resistance type, capacitance type, inductance type and piezo-electric.) transducers and various sensors. b. Sketch each demonstrated transducers and sensors and tabulate specifications, range, resolution and applications of each. 	04
14	IX	<p>TEMPERATURE MEASUREMENT:</p> <ul style="list-style-type: none"> a. Sketch the set up and constructional sketch of thermocouple used to measure temperature. b. Measure the temperature of hot body/hot liquid with thermocouple. c. Record the observation. 	02
15	IX	<p>PRESSURE MEASUREMENT:</p> <ul style="list-style-type: none"> a. Sketch the set up and constructional sketch of pressure gauge used to measure pressure. b. Measure the pressure with pressure gauge. c. Record the observation. 	02
16	IX	<p>FLOW MEASUREMENT:</p> <ul style="list-style-type: none"> a. Sketch the set up and venture meter used to measure flow. b. Measure the flow with venture meter. c. Record the observation. 	02
17	ALL	<p>MINI PROJECT AND PRESENTATION:</p>	06

		<p>a. Select actual mechanical assembly from industry/real life/scrap shop/garage/etc. (made up of at least 4 to 5 mechanical components) and get it approved by teacher.</p> <p>b. Measure geometrical tolerances. Sketch setup drawing to measure geometrical tolerances. Measure geometrical tolerances and record the observations.</p> <p>c. Dismantle the assembly, sketch the parts and measure dimensions. Record your observations.</p> <p>d. Present the work including photographs and movies of actual project work.</p>	
		TOTAL	56

Notes:

- a. It is compulsory to prepare log book of exercises. It is also required to get each exercise recorded in logbook, checked and duly dated signed by teacher.
- b. Term work report must not include any photocopy/ies, printed manual/pages, litho, etc. It must be hand written / hand drawn by student only. Photographs/movies of group members actually working on mini project should be allowed.
- c. Term work report content of each experience should also include following.
 - i. Reports.
 - ii. Student activities.
- d. Mini project and presentation topic/area has to be assigned to the student in the beginning of the term by batch teacher. This may be assigned individually or in the group of maximum 2 to 3 students.
- e. For 40 marks ESE, students are to be assessed for competencies achieved. They should be given following tasks. (i and any one from ii, iii and iv.)
 - i. Measure the linear/angular dimensions and geometrical tolerances of given part/assembly.
 - ii. Measure tooth thickness using gear tooth vernier.
 - iii. Measure effective diameter of given thread.
 - iv. Explain working of transducers and sensors.

8. SUGGESTED LIST OF STUDENT ACTIVITIES.

SR.NO.	ACTIVITY.
1	Visit the workshop and identify the machines and arrangements which require geometrical tolerances.
2	Visit any industry / tool room and observe the working of inspection and testing department. Also prepare the report.

9. SPECIAL INSTRUCTIONAL STRATEGIES.

Sr. No.	Unit		Strategies
1	I	Linear and angular measurement.	Demonstrate actual instrument, video movies of measuring methods.
2	II	Measurement of geometrical	Show actual assemblies require geometrical tolerance, show measuring methods movies.

		tolerances.	
3	III	Measurement of surface roughness.	Show various samples of surface textures, videos,
4	IV	Gear measurement.	Demonstrate use of gear tooth vernier, videos.
5	V	Thread measurement.	Show various forms of threads, show measuring methods movies.
6	VI	Limit gauges.	Demonstrate limit gauges usage.
7	VII	Non destructive testing.	Videos, PPTs, industrial visits.
8	VIII	Transducers and Sensors.	Demonstrate actual transducers and sensors, movies, industrial visits.
9	IX	Temperature, pressure and flow measurement.	Demonstrate actual instruments, movies, industrial visits.

10. SUGGESTED LEARNING RESOURCES.

(A) List of Books:

Sr no.	Title of Books	Author	Publication
1	Mechanical measurements and instrumentation.	R.K.Rajput	KATSON
2	Metrology and Instrumentation.	Tahir	
3	Mechanical Measurement.	Sirohi R.S., Radha Krishnan H.C.	New Age International
4	Practical Engineering Metrology.	K.W.B.Sdarp.	Pitman
5	Engineering Metrology.	R.K.Jain	Khanna Publications.
6	Industrial Instrumentation.	Donald A. Eckman	
7	Industrial Instrumentation & Control	S K Singh,	Tata McGrawHill
8	Mechanical Measurement.	Beckwith & Buck	Narosa publishing House
9	Mechanical Measurement and Control.	D.S.Kumar	Metropolitan Book Pub.
10	Practical Engineering Metrology.	K.W.B.Sdarp.	Pitman
11	Mechatronics.	W.Bolten	PEARSON
12	Gear Metrology	C.A.Scoks.	

(B) List of equipments:

1. Surface plate, 500 x 500 mm.
2. Vernier calliper, 100 to 200mm, least count 0.01mm.
3. Vernier calliper, 100 to 200mm, least count 0.01mm, digital.
4. Inside micrometers, least count 0.01mm, 0-25mm, 25-50mm, 50-75mm.
5. Outside micrometer, least count 0.01mm, 0-25mm, 25-50mm, 50-75mm.
6. Outside micrometer, least count 0.001mm, 0-25mm.

7. Telescopic gauge- 10-100mm.
8. Height gauge- 300mm with least count 0.01mm.
9. Depth gauge- 100 mm with least count 0.01mm.
10. Bevel protector with least count 5'.
11. Clinometers.
12. Slip gauge box-
13. Sine bar- 150mm, 200mm.
14. Straight edge, 500mm.
15. Feeler gauge, radius gauge, thread pitch gauge.
16. Dial indicators magnetic stand.
17. Dial indicators, least count 0.01mm.
18. V blocks.
19. Samples of various surface textures and different surface roughness.
20. Microprocessor- stylus-probe based surface roughness testing machine.
21. Microscope to compare various textures and surface roughness.
22. Gear tooth vernier.
23. Profile projector.
24. Set of best wires to measure thread dimensions.
25. Thread micrometers.
26. Thread pitch measuring machine.
27. Thread
28. Set of limit gauges- sorted sizes, plug gauges, thread ring gauges and snap gauges.
29. LVDT type, resistance type, capacitance type, inductance type and piezo-electric type transducers.
30. Sensors, position, proximate, velocity, force/strain,
31. Thermocouple.
32. Bourdon pressure gauge.
33. Venturimeter.
