❖ **ABOUT STTP**

Energy efficiency belongs at the heart of a low-carbon economy. By reducing energy use and cutting down on waste, we can reduce energy bills, make our energy system more sustainable, and drive down greenhouse gas emissions. This course will help faculties acquire the skills and techniques required to implement energy management. This course will also benefit researchers and students who are interested in working on energy management.

This course is designed to provide the background required for engineers to meet emerging demand of energy conservation and management.

❖ **ABOUT IE(I)**
